

## Case Studies

### Archana

When Archana took birth parents Kanakaiah and Aruna were scared on seeing the feature as she was a pre mature child and at the age of 7 months she was affected with polio they consulted many doctors and spent much money to recover her health but there is of no use, The parents had another baby but she was very normal. Kanakaiah and Aruna occupation is cultivation and agricultural laborers. Archana was kept at home with the grandparents in day time because she cannot move anywhere. She was kept laid for several years and was unable to sit, stand and move. Wherever she wish to move she use to creep on the floor.

After the intervention of CBR (Community Based Rehabilitation) team and concerned specialist and the efforts of made by the family members gave fruitful result now she is able to sit and Stand, eat with her hands and walking with the support. The family is very happy on the gradual change in their daughter.

Archana was taken as a member of the group and her grandparents represents every meeting conducted periodically. They were advocated on the rights and sensitized how to address the issues related to disability. The parents became successful in getting the benefits through IKP.

The entire family is very much thankful to the NPdO team for making Archana's life color full and confident, the parents now providing their services to the girl with optimism.
