Arukula Lachamma

It was very painful to me when I met with an accident 14 years back. The day is unforgettable in my life because that gave me another life. That day I was on the way to attend an occasion along with my two children and I was pregnant woman. When I met with the accident I was taken to the hospital and the doctors made surgery I lost both the legs Due to the heavy bleeding forcibly doctors made abortion. My husband Laxmaiah is very supportive and encouraged me in that difficult situation and leading life with 2 children of age & 4 years, All his relatives and Many other people suggested my husband to marry again but I was successful in convincing him not to marry again.

6

I use to crawl on the floor to do the domestic works really I suffered a lot. A wheel chair was donated to me which was some supportive but it was not accessible to do all the work. I was kept at home premises for years.

When CBR program team came to meet me I shared my problem with them, they said about the pension facility and immediately I applied and accessed to that Not only had this but also explained the problems faced by PWDs in the community. They facilitated me a lot on the rights and entitlements of the PWDs In that way I was able get tri cycle and after 13 years I came out of my home and able to meet all villagers. The SHG group members taught me many things how to avail NREGS work, I got good awareness on the NREGS work and regularly I am working now.

My heart full thanks to NPdO team for encouraging me in all possible ways and making me as member of the group due to this I am leading my life with good confidence.
