

## Case Studies

### Case Study of Tumma Sunitha on Education

I am the second daughter of Balaiah and Devamma. I had two sisters and a younger brother, my family is economically very poor, Right from the birth I am unable to see the world which makes me to cry alone several times I cursed myself for having such life and even GOD for making me blind. As the family conditions were critical my father cannot able to take me to the hospitals regularly He was a daily laborer and every one of the family contribute some efforts for the family existence. My life is restricted to the home and managing the house hold activities.

When I came to know the CBR activities have been initiated in our mandal I felt very happy, I never forget the day when I got identified by the CBRWs and the first interaction, they give the inputs on the rights of the persons with disabilities and provided educational assistance, health and livelihood activities. I became a member in the network I got strong support and able to share my thoughts with my group as well as with other groups with this confidence I developed good interaction with the community and it changed my life style, With the inputs provide on the rights I became aware about the government policies, Now I am receiving the pension and the bus pass facility, I was taught the Braille language and able to continue my education, I am very much happy on providing aids appliances and the special education material, The Group encouraged me and my family by providing livelihood support the sum I have benefited used in breeding Goats to improve myself as well as my family.

In the words of Sunitha "I am thankful to the CBR workers for providing moral support, strength and hope to make my carrier strong."
