

## Case Studies

### Mahesh Babu

Mahesh Babu is the first child to the parents on having the boy child the parents felt happy. But at the age of seven months the parents identified that the child was abnormal no scope of normality in growth like other normal children. And later at the age of 1 and a half year old he was affected with fits and the condition was very horrible, they spent lot of money for the health recovery of Mahesh Babu. After a period of time his father migrated to other place for work and his mother, grandmother took the responsibility of Mahesh.

When the CBR team met Mahesh he was unable to stand and walk, at least he could not eat food and hold things. With the restless efforts of the specialist and CBR team and sincere contribution of the mother the child improved gradually and standing with the support and walking with the support of locally available material. Now he is able to eat and hold things confidently, Mahesh mother is very happy her son is able to work by his own effort as a normal person. His mother requested the CBR team to spread the activities to all areas to bring change in many lives. The CBR team observes the interest of the mother and trained her on the rights, entitlements and services provided by the government and how they can access to the community. Gradually she stepped a head towards success and became a member in the SHG group and strengthening the group in the village and participating very actively in the Network meetings. She thanked the CBR team and others for bringing a great change in the boy and sensitizing the people for making them in addressing the issues in the community.
